

Jannatul Ferdous

Student | Khulna, Bangladesh

ABOUT ME

I am Jannatul Ferdous, a science student from Khulna who has recently completed her Higher Secondary Certificate at Khulna Government College; the result is yet to be published. My journey through BAF Shaheen School and Khulna Collegiate Girls' School gave me a strong academic foundation and a lasting curiosity for learning.

Beyond the classroom, I have built practical skills through a government-certified computer training program (Bangladesh Technical Education Board), defensive driving training at Jahanabad Military Driving School, and first-aid training with the Bangladesh Red Crescent Society. I also study Robindro Shongit, which gives me a creative outlet and a deep connection to our cultural heritage. Together, these experiences reflect who I am: someone who values knowledge, practical preparedness, and creativity in everything she does.
